

PHASE 2 · MODULE 2 · CLASS 2

Create a logo that captures

A logo is the visual cornerstone of a brand's identity.
Free, beginner-friendly tools are enough to get here.

CHOOSE A TYPE · BUILD IN SIX STEPS · PROVE IT SCALES

CANVA · NEW DESIGN

LOGO TYPES TO CHOOSE FROM

Choose the structure first.

The first decision is what the mark is made of. Colours, fonts and icons come later.

NORTHBAKE

Text-based

The name is the mark. Simple, readable and quick to recognise at any size.

 **NORTHBAKE**

Icon + text

A symbol carries the idea, with the name beside it. Useful when the mark must work alone.

NB

Initials or monogram

Built from initials. Compact, and a strong fit when the full name is long.

Pick the structure in step 1. Everything you customise in step 5 hangs off this decision.

SIX STEPS TO BUILD YOUR LOGO

From brand identity to an exported file.

01

Define your brand identity

Mission, values, audience, and the emotions and messages the logo conveys.

02

Explore inspiration

Research logos in your industry for trends and styles that resonate.

03

Choose the right tool

Start in Canva, and explore free options such as looka.com.

04

Template or blank canvas

Browse Canva's logo templates, or create a unique design from scratch.

05

Customise your design

Adjust colours, fonts and icons, and make sure it stays clear at any size.

06

Download and use

Export high-resolution PNG and SVG, then place it across brand materials.

STEP 4 · YOUR STARTING POINT

Template or blank canvas.

Both are legitimate starts. What matters is that the result matches your brand identity.

NORTHBAKE

Export: high-resolution PNG and SVG

Customise a template or create a unique design from a blank canvas. Both paths end in step 5.

STEP 5 · CUSTOMISE AND SCALE

Make it work at every size.

Adjust colours, fonts and icons to match your brand identity – then test the result.

CUSTOMISE

Colours

Match the approved palette.

Fonts

One or two readable choices.

Icons

Only if the type needs one.

ENSURING SCALABILITY

NORTHBAKE

Small

One mark, drawn to hold together as it shrinks.

If the mark only survives at full size, it is not finished yet. Simplify until it does.

PRO TIP · VERSATILITY MATTERS

Black and white. Any background.

A logo has to survive being printed, stamped, reversed and shrunk. Test all of it.

The lesson's pro tip: ensure your logo works well in black and white and on different backgrounds.

PRO TIPS

Three checks before you show a client.

01

Simplicity is key

A clean, straightforward design enhances recognition.

02

Versatility matters

Ensure it works in black and white and on different backgrounds.

03

Seek feedback

Gather opinions from peers or potential customers to refine it.

Every extra element is something a viewer has to decode.

STEP 6 · DOWNLOAD AND USE

One logo, used consistently.

Export the mark, then place it across your brand materials.

HIGH RESOLUTION

PNG

High resolution, ready for social and web.

HIGH RESOLUTION

SVG

Vector file that scales without blurring.

Your logo is the one element every other design decision sits beside.

The next class builds the Brand Kit that keeps all of those elements in agreement.
