

Where your client's customers already are.

Social media marketing is how a business gets found, is trusted and is chosen — and where its people are already waiting.

IN THIS CLASS

- 1 What social media marketing is
- 2 The five key concepts
- 3 How the algorithm decides
- 4 The key platforms
- 5 Your core responsibilities
- 6 Pro tips

WHAT IS SOCIAL MEDIA MARKETING?

More than posting content.

Using platforms like Facebook, Instagram, Twitter and LinkedIn to promote a product, a service or a brand.

Why it matters

01

Brand visibility

Improves how easily people recognise and remember the brand.

02

Direct communication

Opens a two-way line to customers, not just a broadcast.

03

Valuable insight

Analytics show who is watching, clicking and responding.

04

Cost-effective

Reach new people without a large traditional media budget.

Key idea

It is the busiest room in their business.

It is where people spend their time — especially your client's potential customers. That is the audience you are being hired to reach.

FIVE KEY CONCEPTS

Five decisions before you post anything.

1	Set clear goals	Increase website traffic, generate leads or boost sales, then align social with the business goals.
2	Identify the target audience	Understand their demographics, interests and behaviours, then tailor content to what they need.
3	Choose the right platforms	Select platforms that fit the brand, and focus where the audience is most active.
4	Create engaging content	Mix posts, stories and video – relevant, valuable and on brand.
5	Engage with the audience	Reply to comments, messages and mentions fast, and invite conversation.

Remember

Decide first. Then post.

A goal you cannot name is not a goal. Write down what the client wants this quarter before you choose a single platform.

THE ALGORITHM

The platform's brain decides who sees your work.

It reads what people watch, like, comment on and share, then shows them more of what it thinks they will enjoy.

01 Track

It logs what you watch, like, comment on and share.

02 Match

The system predicts what will keep you active.

03 Push

It selects by relevance and engagement, not by luck.

EXAMPLE

Someone who often engages with travel content will be shown more travel posts — which is why the post you publish next matters more than the one you published last.

WHAT YOUR CLIENT GETS

Four outcomes you are hired to produce.

01

Build brand awareness

Consistent posting and branded visuals make the brand easier to remember and trust.

02

Drive traffic and conversions

Clear calls-to-action move people to the site, the offers and the booking.

03

Support community engagement

Reply to comments, DMs and reviews. Connected audiences become loyal customers.

04

Keep the client competitive

Staying active shows the brand is alive, current and ready to serve.

Key idea

You are not filling a feed. You are building recognition.

The more visible the brand, the more likely people are to remember and trust it.
Visibility is the deliverable your posts are paid to build.

KEY PLATFORMS

Every platform rewards a different format.

PLATFORM	BEST FOR	CONTENT TYPES	PRO TIP
Facebook	General audiences, community engagement, multimedia updates.	Reels, photo and video posts, text updates, link shares.	Great for mixing personal and business content.
Instagram	Visually driven content and strong brand aesthetics.	Reels, carousels, single image posts, strategic hashtags.	Use carousels to share tips in a swipe-friendly way.
TikTok	Short-form video with entertainment or teaching value.	Short videos, longer videos, carousel photo stories.	Trending sounds and a hook in the first 3 seconds.
LinkedIn	B2B networking, professional branding, showing expertise.	Thought leadership, industry tips, company updates, case studies.	A clear, professional tone suits corporate and service clients.

Remember

Depth on one platform beats thinness on four.

Do not be everywhere. Be excellent on the one or two platforms your audience already uses, then earn the rest.

YOUR CORE RESPONSIBILITIES

Five jobs you own every month.

01

Plan and schedule

Map what to post, when and where — Google Calendar, Notion, Meta Business Suite, Later.

02

Design in Canva

Posts, stories, carousels and promos in the client's logo, fonts and colours.

03

Write captions, research tags

Match the brand voice, then research hashtags that widen real reach.

04

Post and manage the community

Publish, then reply to comments and DMs and encourage interaction.

05

Track and report

Monitor likes, shares, saves and reach, then organise it into simple reports.

06

Analyse and adjust

Use the numbers to change the strategy, not to admire it.

PRO TIPS

Three habits that protect the work.

01

Consistency is key

Maintain a regular posting schedule so the audience knows what to expect.

02

Quality over quantity

One useful, well-made post beats five that exist only to fill the calendar.

03

Stay updated

Track trends and algorithm changes so the client's content stays relevant.

Your turn

Goal, platform, value, reply. Then measure.

Set a goal, choose the platform your audience actually uses, post something genuinely useful, then reply to every comment — and check the numbers before you do it again.
