

One dashboard for Facebook and Instagram.

Meta Business Suite puts posts, messages, ads and numbers in a single place — but only if you have the right access first.

ACCESS · INSTAGRAM · PLANNER · ADS · INSIGHTS

ACCESS FIRST

Everything else depends on it.

You are only allowed to access Meta Business Suite if you are an admin or a creator of a Page.

You are an admin or creator

The suite opens with every area available: inbox, planner, ads and insights.

You have neither role

The suite will not open for you. Ask the Page owner for access first.

Before you start

Access is the gate, not the detail.

No Page role, no suite. Sort access out before you promise the client anything, or the whole workflow stalls on day one.

THE SEVEN CORE AREAS

Everything the suite does, in one view.

AREAS 1 TO 4

- 1 Home Dashboard**
Recent posts, engagement metrics and notifications.
- 2 Inbox**
Facebook and Instagram messages in one place.
- 3 Posts & Stories**
Create, schedule and manage content on both platforms.
- 4 Planner**
A calendar view of everything scheduled.

AREAS 5 TO 7

- 1 Ads**
Campaigns, budgets and audience targeting.
- 2 Insights**
Performance, demographics and engagement trends.
- 3 Settings**
Account settings, user roles and connected assets.

Remember

Learn the Inbox and the Planner first. They are where the daily work actually happens; the rest you will learn when you need it.

STEP 1

Switch Instagram to a Business account.

- 1 Open the app and log in**
Use the Instagram account you actually want to manage.
- 2 Tap the three lines**
Top right, then choose Settings and privacy.
- 3 Scroll to Account Type and Tools**
Then tap Switch to professional account.
- 4 Choose a category, tap Done**
Blogger, Personal Blog, Entrepreneur — then select Business, not Creator, and tap Next.
- 5 Connect to a Facebook Page**
Choose an existing Page or create a new one, then complete the setup.

Your Instagram account is now a Business Account. Next, connect it to Meta Business Suite so both platforms can be managed from one place.

STEP 2

Connect it to Meta Business Suite.

business.facebook.com

OPEN THIS FIRST

- 1 Go to the site**
Open business.facebook.com in your browser.
- 2 Log in with the right account**
The Facebook account that manages your Page.
- 3 Check the selected Page**
It sits in the top left corner of the screen.
- 4 Click Settings**
Bottom left corner of the screen.
- 5 Open Instagram Connection**
Found inside Settings.
- 6 Click Connect Instagram**
The connection button appears here.
- 7 Log in to Instagram**
Use the Instagram username and password.
- 8 Authorize and confirm**
Finish and confirm the connection when asked.

WHAT A FINISHED CONNECTION LOOKS LIKE

Instagram connected

Posts & Stories unlocked

Insights covers Instagram

AREAS 1 TO 4

Four areas you will use every single day.

Home Dashboard

An overview of performance: recent posts, engagement metrics and notifications.

Inbox

Messages, comments and interactions from Facebook and Instagram in a single location.

Posts & Stories

Create, schedule and manage content across both platforms, with consistent branding.

Planner

A calendar view of your scheduled posts and stories, so the strategy stays organised.

Key idea

Reply like a person, not a platform.

The Inbox is where a VA earns trust. One fast, human reply beats a week of perfect scheduling.

AREAS 5 TO 7

Three areas that take the account further.

01

Ads

Create and manage advertising campaigns, set budgets, and target specific audiences to maximise reach and engagement.

02

Insights

Detailed analytics on content performance, audience demographics and engagement trends, so your decisions have something behind them.

03

Settings

Manage account settings, user roles and connected assets to keep control of the business's online presence.

Remember

Learn the daily areas first and the growth areas second. A suite you cannot navigate is just another login screen.

PRO TIPS

Three habits that make it faster.

01

Utilize the Planner

Plan the month in the calendar view instead of posting ad hoc.

02

Monitor Insights

Check performance often enough that you can change what is not working.

03

Manage Communications

One Inbox clears Facebook and Instagram together, so nothing is missed.

Your turn

One login, one inbox, one calendar.

Mastering the navigation of Meta Business Suite saves time and lifts the brand's online impact. That is the whole reason you learned it.
